## PROFESSIONAL EXPERIENCE

### Support Developer

03/2023 – Present

#### RAMONA

- Facilitated meetings with a graphic designer to implement changes on a Shopify POS site, ensuring pixel perfect alignment with the provided wireframe design in Figma.
- Communicated effectively with clients gaining continuous, weekly feedback to ensure the product exceeded expectations.
- Exhibited adaptability, promptly adjusting to changing requirements by accepting the challenge and outlining new goals.
- Conducted thorough end-to-end testing with a test-to-break method, creating multiple test cases to ensure every aspect of user functionality works as intended.
- Embraced continuous learning by acquiring expertise in Liquid, a Ruby-based language, to support Shopify site development.

### Junior Developer

08/2022 – 03/2023

#### School of Code

- Developed a full stack bar finding web app within a 4-week deadline, completing 119 pull requests and over 300 commits, ensuring our users find their perfect bar.
- Offered comprehensive filtering options including categories such as pet friendliness to ensure users can find exactly what they want – something similar apps don't do well.
- Worked in pair programming sessions with weekly hackathons, communicating ideas and providing/receiving constructive feedback to/from team members.
- As a Scrum Master, changed our working practices to ensure components were thoroughly tested before tickets were completed. Successfully completed 95 overall tickets.
- Delivered comprehensive demonstrations that highlight product benefits and features.
- Utilised user-centred design principles to improve UI/UX, creating a user-first product while maintaining brand identity and consistency.
- Organised, ordered and broke down tasks into manageable portions, ensuring core features were implemented first to fulfil an MVP first with stretch goals defined.
- Utilised GitHub actions for CI/CD to automate testing, build and deployment to ensure efficient and robust code.

---

## EDUCATION

### University of Portsmouth

BSC Economics – 2:1

- Specialising in mathematical/statistical techniques and theories.
- Utilised raw data from various sources to model into usable data for the purpose of analysis.

---
